

NEW! Finger Scan Bundle!

Revolutionize Your
Attendance Tracking!

AFTER SCHOOL PROGRAMS

The most reliable, accurate,
and safest way to track attendance.

FSAS FOR AFTER SCHOOL

Innovative Finger Scanning Attendance System (FSAS) uses biometrics to safely and accurately identify each student.

The considerable costs and daily interruptions associated with verifying paper rosters, replacing lost or stolen ID cards, and ensuring student safety can limit your ability to effectively run a quality program. Inaccurate attendance records can also threaten your program's funding.

Cayen Systems' NEW Finger Scan Bundle gives you everything you need to get up and running quickly with a powerful finger scanning system that can give you the confidence you need that your attendance is accurate every time!

The basic bundle includes the finger scanning unit and a Wi-Fi ready Dell Netbook that is configured with the FSAS software and scanner drivers. Boot it up, connect to the internet and you are ready to go!

- Easy to Use
- Completely Accurate
- Highly Secure
- Convenient
- Instantly Uploads to Software
- Cost Effective
- Cutting Edge Technology

Finger scanning unit and software also available separately.

Activity Name	Session Description	Avg Hours/Session	# Attended	# Adults	# Youth	# Times/ Days Offered	Total Hours Daily Offered
							Count/ Percent of participants Attending > 50%
							Count/ Percent of participants Attending > 50%

ACCURATE ATTENDANCE REPORTS

How FSAS Works with Your After School Program....

1. SET UP

A PC or Netbook with a finger scanner and internet access is required at each service location.

2. SCAN-IN

Students simply place their finger on the scanner and attendance for the student is automatically recorded for the initial activity selected. If a program tracks individual activities, an option is available that will copy attendance to each of the student's activities for that day.

3. SCAN-OUT

Students do not need to scan out at the end of the day if they attend the entirety of the program, or if attendance is not tracked by activity. If a student leaves an activity early, no attendance will be recorded after the "outscan" time.

4. UPLOAD TO CAYEN AFTERSCHOOL SOFTWARE

Student attendance times are imported into Cayen AfterSchool instantly with the click of a button. Start and end times can be rounded if needed to account for long lines of students waiting to scan in or out.

NOTE: Each student's finger scan must be enrolled before recording attendance (a less than one minute process per student).

BENEFITS

STREAMLINE ATTENDANCE COLLECTION

Save time by not having to create, print and record attendance on rosters only to re-enter it (by hand or with a bar code scanner) into your software later. While paper rosters can still be created and printed from the Cayen AfterSchool system they are no longer required for attendance recording purposes.

ENSURE ACCURACY

If all students scan in at the program's first activity, attendance will be 100% accurate! Accurate attendance reports can help your program tell its story and strengthen sustainability efforts.
